

November 2014

"To the team at SOLID INFINITY GYM,

I'd like to say a massive thank you for the amazing product you have installed in my Rehab Gym.

EastWest Physiotherapy is all about quality and results, the installation of the SIS GYM system has far exceeded our expectations.

The look and finish is stunning and complements our other top end Pilates and strength training layout.

We replaced one Smith machine for four new exercise stations (Squat Rack, TRX Olympic Rings, Tricep Dips and Bench Press).

The system runs along an entire wall. We also benefited by having endless storage and weight stacking areas which has made our space more efficient.

I'd recommend this system to all trainers and physios looking for excellence. My staff and clients all love it."
