TO WHOM IT MAY CONCERN:

We are a busy rehabilitation hospital with a high volume of both inpatients & outpatients.

Our aim is to provide a quality programme for a diverse case mix.

Our patients have often had major surgery, debilitating injury or illness.

When outfitting our new gym we were faced with the issue of managing multiple patients within the area's space constraints. We were also looking for something sleek & aesthetically appealing.

When discussing these issues with the team at **SOLID RACKS** we found them incredibly helpful.

Their suggestions were both insightful & innovative.

The **SOLID INFINITY GYM SYSTEM** was the perfect solution.

Every step from the design team through to the final installation was flawless.

I was impressed by the staff's knowledge, passion & efficiency.

The **SOLID INFINITY GYM SYSTEM** has created the space, versatility & durability needed to provide quality rehabilitation.

This is the best solution on market.

Sincerely,

Kerri Clare RN, CRRN

Clinical Services Manager
